

Second Nature Recycled Paper Fiber, Straw Tack, MODOT Approved Straw Tack and KDOT Approved Straw Tack Specifications

Product(s)

Second Nature Recycled Paper Fiber Mulch, Straw Tack and MODOT Approved Straw Tack are made from a combination of post consumer recycled paper. It is non-toxic, biodegradable and contaminant-free.

*This product is also available with tackifier added in the bag. KDOT Approved Straw Tack is loaded at 4%. Other versions of Paper Fiber with Tack are loaded at 3%.

Mixing Procedure

Mix Second Nature Recycled Paper Fiber Mulch in up to 150 gallons of water to each 50-pound bag.

Add tackifiers as specified

Tank Time

Second Nature Recycled paper Fiber Mulch absorbs water quickly to become workable slurry. The slurry should appear as a blend with no separation in the mulch and water.

Application

Apply Second Nature Recycled Paper Fiber Mulch with seed and fertilizer added, or as a separate application after drilling or broadcasting. Good soil preparation is essential. Slurry containing seed and fertilizer is best applied from the hose by pointing the nozzle straight down to drive the material into the soil. The application should then be topped-off by allowing the material to “rain on” the surface to achieve approximately a 85-90% coverage appearance.

Mix Ratio & Coverage Data

Mix ratio - - - - - 1 bag in up to 150
gallon of water

Minimum required usage – 1,500 lbs. per acre.

Appearance

Second Nature Recycled Paper Fiber Mulch will appear dark green at the time of application. During the curing process, the color will gradually fade.

Equipment

Second Nature Recycled Paper Fiber Mulch is mixed and applied with a standard hydroseeding machine. A mechanical paddle-type agitator is recommended.
