Save the Date

You are cordially invited to the 2014 "Clean and Green" Sustainability Conference and Expo. This year's educational conference will feature a case study format, focusing on projects created as a result of our previous "Clean and Green" Events. Vendors are already committing to our expo hall and speakers are almost all confirmed.

It looks to be another informative event that we hope you won't miss!!

The Editor's Viewpoint: Oops and Opportunity

Well if you didn't notice, this is actually our 3rd and 4th issue of our newsletter. We got behind on getting out our newsletters but have recovered with some really good content and a lot of it. From Manta Ray earth anchors in our product spotlight to the great project in Riverside, we bring you our final newsletter (s) of the year. We hope we have created some interest for you.

I also wish to take this opportunity to Thank You all for your support this year. We seem to continue to see a few signs that construction is on the rebound and we certainly hope so. We had another successful year in 2013 and we can only hope that a few more projects become available in 2014. Whether it is a specific erosion control problem or an interest in one of our Low Impact Development Solutions, we welcome the opportunity to not just help you with information and documentation, but we may be able to offer some value engineering alternatives that you may not have thought of. We have really had a good year creating opportunities for value to be added to projects and have given owners, developers and contractors real chances at additional profits and more successful projects. We look forward to the opportunity to do that for you in 2014.

Don Thieman, CPESC, LEED GA
