

## Product Spotlight

A portion of the stream and stream bank throughout the Greenbelt

The first section of Geoweb installed down the slope

Note the support tendons distributing the load evenly through the section

**Project Name:** Greenwood Hills Creek Restoration

**Engineer:** Nilles Associates

**Contractor:** Corell Contractor Inc.

**Quick Supply Rep:** Steve Krehbiel

**Product:** 3" 20V Geoweb

**Manufacturer:** Presto GeoSystems

**Application/Solution:**

Steep Slope Stabilization using Geoweb

**Product:** Flextera Hydromulch

**Manufacturer:** Profile Products

### Challenge:

The City of Johnston had developed residential housing through a greenbelt area, and over the past 20 years, no improvements had been made to the stream or stream bank itself. Overgrown trees and badly eroded banks needed severe attention.

### Solution:

The Presto Geoweb cellular confinement system was selected and designed to help stabilize the steeper slopes along the creek after grubbing and clearing of overgrown trees. The geocell product was infilled with an amended soil and then hydroseeded.

### Results:

Approximately 21,000 sf of stream bank was permanently stabilized with the geocell product, along with native grasses and plugs incorporated into the landscape, this will help preserve the highly profiled residential homes, and back yards throughout the neighborhood. [Learn more >](#)

Amended soils introduced in the cells

Flextera mulch and seeded

## Editor's View

### Danke Schoen

I thought I would try a different way to say Thank You as I am always reminded this time of year how very fortunate we are. Quick Supply and ASP Enterprises had another year of success with all of our customers: our designers-engineers, architects, landscape architects, etc., our contractors-utility, erosion control, landscapers, excavators, road builders and more and our manufacturers that support our educational efforts and truly partner with us to grow our business. As every year ends we are thankful to all of you and know we can't take on the challenges of the next year without you. We hope we continue to deserve your business with exceptional service and true relationships that work both ways.

Gracias, Merci, תודה, takk, Dziękujemy, Спасибо, diolch, Thank You!
