2014 "Clean & Green" Sustainability Conference and Expo.

Once again, it is that time of year to register for the ASP and Quick Supply "Clean & Green" Conference and Expo.

We will start in Omaha on Mar. 11th and work our way through the Midwest to finish it in St. Louis on Mar. 14th. Our show will continue upon the theme of "Low Impact Development". This year we will expand on some of the popular solutions from last year's "Clean & Green" in addition to offering new and innovative ideas. Our Expo Hall, as always, will be filled with representatives from some of the best manufacturers in the country, as well as some local and regional companies too.

This is shaping up to be a great value for education and PDH's. We thank you for considering your attendance. [Click here for a link to the full "Clean & Green" brochure or to register online.](#)

Omaha: March 11, 2014: [Click here to register](#)
Des Moines: March 12, 2014: [Click here to register](#)

St. Louis: March 14, 2014: [Click here to register](#)

Presented by the Midwest's Most Trusted Site Solutions Provider.

Featured Solution

Lake Edge Treatment is a particularly satisfying part of our site solutions as it can turn a normal looking, sometimes eroding bank on a pond or lake, into something aesthetically exceptional. Shorelines can present far-reaching erosion-control challenges. Variable flow conditions and shoreline shear stresses have to be considered, as well as the effects of flooding, runoff, topography, and the need to protect water quality and aquatic and wildlife habitats. There are also issues of aesthetics, and, of course, budgets. We have again brought several alternatives to the design board for your consideration: [Learn more >](#)
