

New Product

Outdoor kitchens and bars made easy with RTF.

Our Ready-To-Finish Outdoor Kitchen Cabinet System is an easy, fast and profitable alternative to building custom outdoor kitchens with concrete blocks. The modular system includes individual cabinets ranging in size from 6" wide to 72" wide, in 6" increments. Each cabinet is engineered to ship knocked-down, so it's easy to get to the backyard and assembles faster than any other system on the market. [Learn more >](#)

Ready-To-Finish Outdoor Kitchen Systems

Currently available in St. Louis only.
Special order in other markets.

Engineer's Note

Making its debut this month in the newsletter is the **Engineer's Corner**. This section will be devoted to the technical side of the ASP / Quick Supply products and services. Topics will range from erosion control selection guide to selecting the appropriate geotextile for your site to introducing new products and industry trends.

For the inaugural *Engineer's Corner*, I'd like to introduce myself and my role with ASP / Quick Supply and share how I can help you with upcoming projects. I graduated from Kansas State University with a degree in Civil Engineering. After working as a structural engineer for 7 years, I have been in the construction industry in Kansas and Missouri for the past 10 years. I started in sales and then transitioned to marketing/ promotion / technical assistance of drainage, bridge, erosion control and storm water products. I work with engineers, municipalities, state agencies and private owners to solve their site problems. My background in sales also helps me understand and appreciate the entire product cycle from design to construction. I strive to find solutions

that are both reasonable to the engineer, cost-effective to the owner and easily installed & maintained for the contractor. I love this side of our business – working with a customer to solve a problem. I'm especially excited to be with ASP/Quick Supply in this new role.

Todd Black, P.E.

As the Specifications Engineer for ASP / Quick Supply, I cover our Kansas City, Des Moines, Omaha and Wichita offices from an engineering standpoint. I assist your local ASP/ Quick Supply salesmen with promotion of our products, site visits, product selection and estimates as well as technical presentations. I've often thought of my role as a consultant to the consultant. My job is to make your job easier. Whether that is simply providing a specification or something more complicated like providing a composite solution with multiple products, I am here to help you.

Please let me know if there is anything I can do for you. I can be reached at tblack@aspent.com or 913-660-5963.

Company Information

ASP Enterprises, Inc. and Quick Supply Co.

For more than three decades, A.S.P. Enterprises and Quick Supply Co. has served the erosion control industry with integrity and expertise. We provide engineers and landscape contractors the exceptional value for their money and have grown to become the Midwest's full-line distributor of erosion-control, geosynthetics, storm water management products, wall block, landscape pavers, and drainage products.
