

New Product

ACE Fiber is a high strength fiber additive that increases the performance characteristics of asphalt pavements. Used in concrete for decades, fiber reinforcement can now be used in asphalt to significantly increase performance of new asphalt pavement. ACE Fiber is comprised of engineered aramid (Kevlar™) fibers and a fiber control treatment using Sasobit™ that also provides asphalt performance enhancement properties.

Aramid Fiber

- Increases Strength
- Increases Crack Energies
- Increases Fatigue Life
- Increases Thermal Crack Resistance

Sasobit™ Treatment

- Increases Rut Resistance
- Improves Coating of Aggregate
- Increases Compaction Window
- Reduces Binder Aging

To learn more, see our [ACE Fiber page](#).

Engineer's Note

Do Something

Engineers are often accused of over-analyzing or over-thinking a problem. While it is good to be thoughtful and thorough, we must avoid the old adage, "paralysis by analysis". We tend to focus on all of the ways a solution may possibly fail rather than be optimistic about the possibility that a solution may actually work. Our industry is working hard to improve water quality and protect the environment so we now have many new and innovative solutions available in our toolbox. Trying something new-to-you for the first time is intimidating and engineers are often averse to risk, so they often continue to use an age-old method (even if it doesn't work well) as opposed to stepping out on a limb to try something innovative. Let us help you get over the fear of trying something new-to-you. ASP Enterprises/Quick Supply only carries proven solutions that work. Our stormwater management solutions have been proven successful in many parts of the U.S. in many different settings. We can help you through the entire process: concept, design, bidding, pre-construction, construction and post-construction phases. You have trusted us to bring you the best erosion control, sediment control and geosynthetics for decades. Now trust us to help you stay ahead of the competition with your stormwater management efforts.

Don't fall into the trap of only doing what you're familiar with because you're too busy to try something new. And the do-nothing alternative is no

longer acceptable. Across the Midwest cities, counties and states are requiring your best effort to control stormwater runoff, reduce downstream erosion, improve water quality and mitigate the adverse effects of changes in land use. Let us help you do something... new... different... better than you ever have before. Call your ASP/Quick Supply rep today.

Company Information

ASP Enterprises, Inc. and Quick Supply Co.

For more than three decades, A.S.P. Enterprises and Quick Supply Co. has served the erosion control industry with integrity and expertise. We provide engineers and landscape contractors the exceptional value for their money and have grown to become the Midwest's full-line distributor of erosion-control, geosynthetics, storm water management products, wall block, landscape pavers, and drainage products.
